SAUMAY KHANDELWAL

SENIOR SOFTWARE ENGINEER

PROFILE

Experienced Software Engineer with expertise in designing scalable, reliable systems and integrating AI and Machine Learning into production environments. Passionate about building robust architectures that adapt to evolving requirements, ensuring efficiency, resilience, and long-term performance. Skilled in anticipatory problem-solving to create future-proof solutions for complex challenges.

SKILLS

Languages: Java, Go, Python

Miscellaneous

- Distributed systems
- multi-tenant SaaS applications and platforms
- Microservices
- Spring Boot / Spring / Spring Cloud
- SQL / NoSQL Databases
- AI Agenta
- Fine tuning LLMs

Interests

- Reading tech blogs / research papers
- Database Internals
- Machine Learning

EDUCATION

Bachelor of Technology *(2015 – 2019)*
VIT University, Vellore
CGPA: **9.35**

Higher Secondary (CBSE) *(2015)*
St. Paul's School, Mathura
Percentage: **94%**

HOBBIES

- Reading
- Go Karting
- Quizzing
- Star Gazing
- Physics

WORK EXPERIENCE

Google *(Nest)*
[SWE-III] *(Nov 2023 – Present)*

- Developing and maintaining infra for creating on-demand virtual devices.
- Developing framework for comprehensive integration testing leveraging auto generated contracts using LLM that eliminate the need to launch dependent services in a hermetic environment, hence improving success %ge to 90% and saving 10,000+ dev hours.

Uber *(Growth and Marketing Platform)*
[SDE-2] *(Nov 2022 – Nov 2023)*

- Developed **multi-tenant subscription, notification and anomaly detection systems** to detect anomalies in ad ingested data, thus saving 300K$+ of performance marketing budget annually**.**
- **C**reated insightful scheduled dashboards for marketers and stakeholders.

Upstox *(Customer Acquisition and Platform teams)*
[Senior Software Engineer] *(April 2021 – Nov 2022)*

- Led the effort in **automating the Demat account creation process from 3 days to just a few hours** by bypassing costly proprietary software and automating manual workflows, saving >50000$ yearly.
- Witnessed 2000%+ growth in active users, from 40,000 to 1M+, by redesigning profile, onboarding, notification services and their databases to cater to the increased load.
- Designed and developed the **backend for** Upstox onboarding flow by **c**ollaborating with government institutions, following extremely rigid timelines and SEBI mandates.
- Wrote multiple Java based multi-tenant libraries for **config-manager, circuit breaker** and **persistence**, thus making the integration much easier for developers.

Sabre *(PNR Reservations Team)*
[Contributor Software Engineer] *(Dec 2020 – April 2021)*

- Resolved cross-cutting concerns in the microservice architecture

[Associate Software Engineer] *(July 2019 – April 2021)*

- Offloaded code from mainframe by developing critical components of PNR Services (Frequent flyer, Display, Commit) from scratch following **microservice architecture** that can be readily deployed to **Google Cloud Platform.**

[Software Developer Intern] *(January 2019 – June 2019)*

- Replace MQ with Kafka for efficient streaming and log aggregation.
- Implemented Single Sign-On using LDAP authentication.

PROJECTS

- European Rover Challenge'18 *(Dec 2017 – Sept 2018)*
[Programming Lead]
Led CS team of 7 members. Developed in-house object detection and avoidance system using ML and statistics, robotic arm simulator and remote controller for the Mars rover.

- Sabrina: Navigation Assistant for blinds *(Jan 2019 – Feb 2019)*
[Tech Lead]
Sabrina is a voice enabled portable device that can be used by blinds for navigation using inputs from camera and ultrasonic sensors facilitated by object detection using machine learning.

AWARDS AND RECOGNITION

- Second runner-up at Upstox Hackathon 2022.
- Represented country and college in ERC'18 and secured 2nd rank in Asia overall, 18th rank among 65 entrants from all over the world.
- Winner of Sabre Hackathon and Sabre Demo Day.
